NONCOMPLIANCE NOTICE

September 14, 1989

Date

Issued to: Elmer W. Roller

Address: 1000 E. Fox Lane

An inspection of the premises located at 1000 E. Fox Lane discloses noncompliance with Codes or Ordinances of the Village of Fox Point as hereinafter listed:

1. Eliminate clear water from the sanitary sewer and provide a Code-complying clear water sump.
2. We recommend that the existing electrical service be updated to comply with Section 16.21 (3) of the State Code.
3. Provide bonding jumper as per Code @ the water meter.
4. Smoke detectors are required for each level including the basement.
5. Code-complying handrail is required for the basement stairs.
6. The door and frame assembly between the attached garage and dwelling shall have a minimum fire rating of twenty minutes as per Code.

The premises at the above address shall be brought in compliance before there is a change in occupancy. Please notify this office when corrections have been made and a reinspection of the premises for compliance is desired.

The occupant or proposed new occupant of the premises feeling aggrieved by the action of the Building Inspector may appeal to the Board of Appeals following the usual procedure on appeal from an order of the Building Inspector within thirty (30) days of the above date.

Mr. Scott Miller
Building Inspector
Village of Fox Point
7200 N. Santa Monica Blvd.
Fox Point, WI 53217

Dear Mr. Miller,

As I stated in our phone conversation on October 20, 1989: my wife and I will install a new, solid core door and frame assembly (if necessary) between the attached garage and dwelling at 1000 E. Fox Lane. This action, upon your inspection, will satisfy the noncompliance notice served upon Elmer W. Roller (previous owner).

As you stated, upon receipt of this letter a temporary occupancy permit will be issued allowing 30 days to complete the course of action mentioned above.

Please copy me on any pertinent correspondence regarding this matter.

Sincerely,

A handwritten signature in cursive script that reads "Christopher M. Schelble".

CERTIFICATE OF COMPLIANCE

No. 2718

Date October 26, 1989

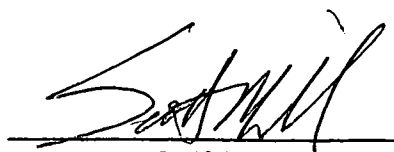

Issued to Elmer W. Roller

Address 1000 E. Fox Lane

This Certificate of Compliance permits a change in the occupancy of the premises located at 1000 E. Fox Lane

in Fox Point, Wisconsin, any time within one year from the date hereof, and indicates that so far as can reasonably be determined by a visual inspection of the premises and a review of the Village records, the premises meet the requirements of Section 30P.62 of the Fox Point Building Code. This certificate is issued for the benefit of the Village of Fox Point in the enforcement of Section 30P.62 of the Fox Point Building Code. Neither the Village of Fox Point nor the Building Inspector assumes any liability in or as a result of the inspection or issuance of this Certificate of Compliance and by the issuance of this Certificate of Compliance does not guarantee or warrant as to the condition of the premises inspected.

INSPECTION DEPARTMENT
VILLAGE OF FOX POINT
7200 N. SANTA MONICA BOULEVARD
FOX POINT, WI 53217
NONCOMPLIANCE NOTICE

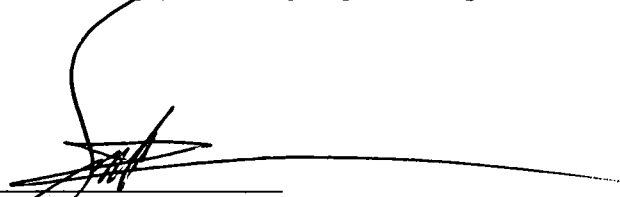

March 5, 1998

Issued to: Christopher & Mary Schelble

Address: 1000 E. Fox Lane

An inspection of the premises located at 1000 E. Fox Lane discloses noncompliance with Codes or Ordinances of the Village of Fox Point as hereinafter listed:

1. Provide back flow protection for all exterior hose bibs and laundry tub faucets.
2. Smoke detectors are required for each floor level including the basement.
3. Please remove the non code complying garage light fixture.
4. Please ground the garage door opener.

Scott Miller
Building Inspector

CERTIFICATE OF COMPLIANCE

March 24, 1998

NO. 4177

Issued to: Christopher M. & Mary C. Schelble

Address: 1000 E. Fox Lane

This Certificate of Compliance permits a change in the occupancy of the premises located at 1000 E. Fox Lane, Fox Point, Wisconsin, any time within one year from the date hereof, and indicates that so far as can reasonably be determined by a visual inspection of the premises and a review of the Village records, the premises meet the requirements of Section 30P.62 of the Fox Point Building Code. This certificate is issued for the benefit of the Village of Fox Point in the enforcement of Section 30P.62 of the Fox Point Building Code. Neither the Village of Fox Point nor the Building Inspector assumes any liability in or as a result of the inspection or issuance of the Certificate of Compliance and by the issuance of this Certificate of Compliance does not guarantee or warrant as to the condition of the premises inspected.

TIMBERSTRAND

1 3/4" Width Pieces:

- Minimum of 2 rows 16d (3 1/2") nails at 12" on-center
- Minimum of 3 rows 16d (3 1/2") nails at 12" on-center for 14", 16" and 18" beams
- Nailed connections require an additional row of nails when nail size is smaller than specified above (minimum 0.131" x 3.25")

3 1/2" Width Pieces:

- Minimum of 2 rows 1/2" bolts at 24" on-center, staggered

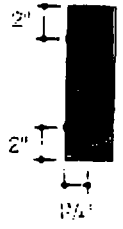

L6

Multiple pieces of TimberStrand® LSL can be nailed or bolted together to form a header or beam of the required size, up to a maximum width of 7"

MULTIPLE MEMBER CONNECTIONS FOR SIDE-LOADED BEAMS

ASSEMBLY A

2 pcs. 1 3/4"

ASSEMBLY B

3 pcs. 1 3/4"

ASSEMBLY C

1 pc. 1 3/4"
1 pc. 3 1/2"

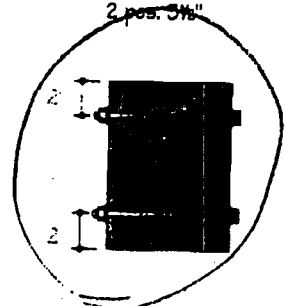

ASSEMBLY D

1 pc. 1 3/4"
1 pc. 3 1/2"
1 pc. 1 3/4"

ASSEMBLY E

2 pcs. 3 1/2"

470	705	505	1015
355	530	380	760
355	530	520	1045
315	470	465	930
		860	1720

NAILED CONNECTION values may be doubled for 6" on-center or tripled for 4" on-center nail spacing.

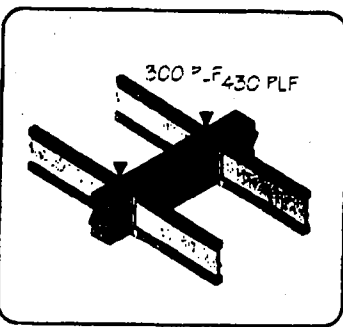

3pc bolts are to be material conforming to ASTM standard A307 (machine bolts). Bolt holes are to be the same diameter as the bolt, and located 2" from the top and bottom of the member. Washers should be used under head and nut.

For a three-piece member, the nailing specified is from each side.

** wide beams should only be side-loaded when loads are applied to both sides of the members (to minimize rotation).

NAILED CONNECTION values require an additional row of nails when nail size is smaller than specified above (minimum 0.131" x 3.25").

EXAMPLE PROBLEM

Solution:
First, check allowable load tables to verify that 3 pcs. can carry the total load of 730 plf with proper live load deflection criteria. Maximum load applied to either outside member is 430 plf. For a 3 pc. 1 3/4" multiple assembly, 2 rows 12d (3 1/4") nails at 12" o.c. is good for only 355 plf. Therefore, use 3 rows 12d (3 1/4") nails at 12" o.c. (good for 530 plf). Alternate: 2 rows 1/2" bolts at 12" o.c.

GENERAL NOTES

- Verify adequacy of beam in uniform load tables on pages 10-15.
- Values listed are for 100% stress level. Increase 15% for snow-loaded roof conditions or 25% for non-snow roof conditions, where code allows.
- Beams wider than 7" require special consideration by the design professional.
- Values listed assume connection of multiple pieces of the same beam or header material. Contact your Trus Joist representative if multiple member beams of different products are required.
- Connections are based on NDS 1997.

PARALLAM

1 3/4" Width Pieces:

- Minimum of 2 rows 12d (3 1/4") common nails at 12" on-center
- Minimum of 3 rows 12d (3 1/4") common nails at 12" on-center for 14", 16" and 18" beams.
- Nailed connections require an additional row of nails when nail size is smaller than specified above (minimum 0.128" x 3").

3 1/2" Width Pieces:

- Minimum of 2 rows 1/2" bolts at 24" on-center, staggered.

L6 Multiple pieces of Parallam® PSL can be nailed or bolted together to form a header or beam of the required size, up to a maximum width of 7"

Multiple Member Connections for Side-Loaded Beams

Assembly A

12"

Assembly D

1 pc. 1 3/4"
1 pc. 3 1/2"
1 pc. 1 3/4"

12" 12"

Assembly E

2 pcs. 3 1/2"

2"
2"

7" wide beams should only be side-loaded when loads are applied to both sides of the members (to minimize rotation)

Values in table are for dry-service conditions only. For Wolmanized® Parallam® PSL used in Service Level 1 or 2 conditions, multiply table values by 0.7

Maximum Uniform Load Applied to Either Outside Member (PLF)

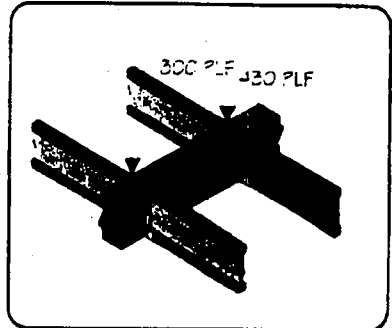

Assembly	Nailed Connection (1)(2)		Through-Bolted Connection (4)		Structural Wood Screw Connection (5)	
	3 Rows 12d (3 1/4") Nails at 12" on-center	2 Rows 12d (3 1/4") Nails at 12" on-center	2 Rows Bolts at 12" on-center	2 Rows Bolts at 12" on-center	2 Rows Screws at 12" on-center	2 Rows Screws at 12" on-center
A	470	705	505	1015	500	995
B	355	530	380	760	375	745
C	355	530	520	1045	375	745
D	315	470	465	930	330	665
E			860	1720	500(5)	995(5)

- (1) NAILED CONNECTION values may be doubled for 6" on-center or tripled for 4" on-center nail spacing.
- (2) NAILED CONNECTION values require an additional row of nails when nail size is smaller than specified above (minimum 0.128" x 3").
- (3) A307 bolts with washers required. Bolt holes to be 1/16" maximum.
- (4) Screws must have self-drilling tip and minimum bending yield strength of 217,000 psi. Lead holes may be required by local building official.
- (5) 6" screws required.

General Notes

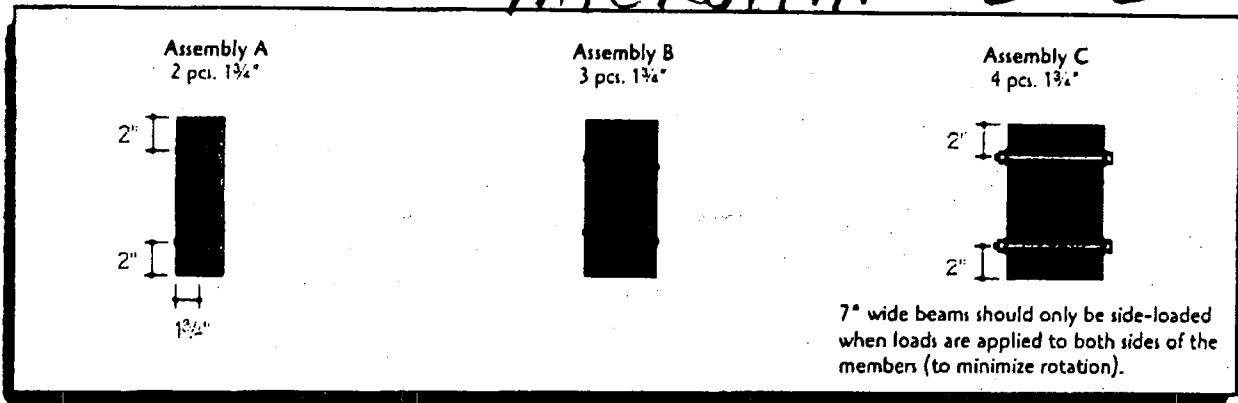

- Verify adequacy of beam in uniform load tables on pages 8-13.
- Values listed are for 100% stress level. Increase 15% for snow-loaded roof conditions or 25% for non-snow roof conditions, where code allows.
- Use specific gravity of 0.5 when designing connections for non-treated Parallam® PSL. (See page 22 for treated Parallam® PSL specifications.)
- Beams wider than 7" require special consideration by the design professional.
- Connections are based on NDS © 1997.
- Corrosion-resistant

Example Problem

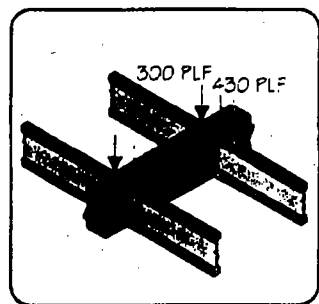

Solution:
First, check allowable load tables to verify that 3 pcs. can carry the total load of 730 plf with proper live load deflection criteria. Maximum load applied to either outside member is 430 plf. For a 3 pc. 1 3/4" multiple assembly, 2 rows 12d (3 1/4") nails at 12" on-center is good for only 355 plf. Therefore, use 3 rows 12d (3 1/4") nails at 12" on-center (good for 530 plf). Alternates: 2 rows 1/2" bolts or 1/4" x 3 1/2" screws at 12" on-center.

MICROLLAM LVL

MAXIMUM UNIFORM LOADS ALLOWED TO FITTER OUTSIDE MEMBERS

NAILED CONNECTION		BOLTED CONNECTION	
COMMON	COMMON	COMMON	COMMON
470	705	505	1010
355	530	380	760
-	-	340	680

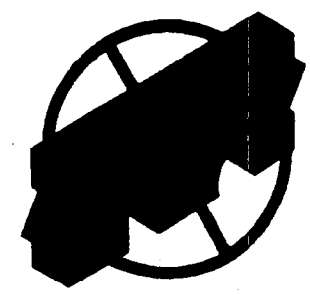

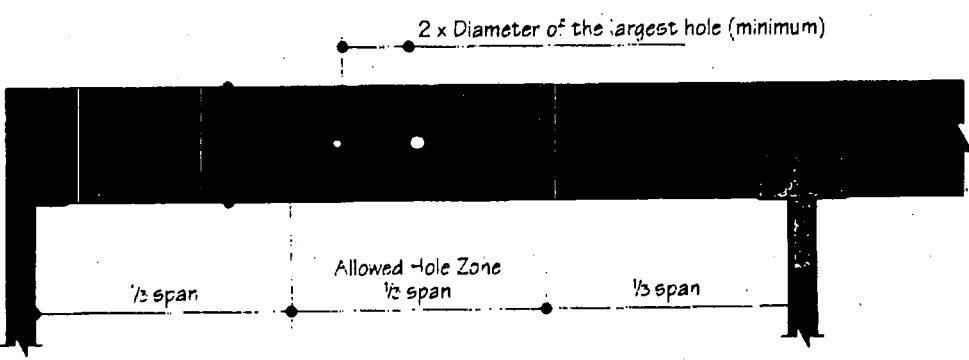

EXAMPLE PROBLEM
Solution:
 First, check allowable load tables to verify that 3 pcs. can carry the total load of 730 plf with proper live load deflection criteria. Maximum load applied to either outside member is 430 plf. For a 3 pc. 1 3/4" multiple assembly, 2 rows 16d (3 1/2") nails at 12" o.c. is good for only 355 plf. Therefore, use 3 rows 16d (3 1/2") nails at 12" o.c. (good for 530 plf). Alternate: 2 rows 1/2" bolts at 12" o.c.

- (1) NAILED CONNECTION values may be doubled for 6" o.c. or tripled for 4" o.c. nail spacing.
- (2) Bolts are to be material conforming to ASTM standard A307 (machine bolts). Bolt holes are to be the same diameter as the bolt, and located minimum 2" from the top and bottom of the member. Washers should be used under head and nut.
- (3) For a three-piece member, the nailing specified is from each side.
- (4) 7" wide beams should only be side-loaded when loads are applied to both sides of the members (to minimize rotation).

- GENERAL NOTES**
- Verify adequacy of beam in uniform load tables on pages 8-13.
 - Values listed are for 100% stress level. Increase 15% for snow loaded roof conditions or 25% for non-snow roof conditions, where code allows.

ALLOWABLE HOLES FOR UNIFORMLY LOADED BEAMS

DO NOT cut, notch or drill holes in Microllam® LVL except as indicated in table below and illustration at left

- GENERAL NOTES:**
- The Allowed Hole Zone is suitable only for uniformly loaded beams using maximum loads for any tables listed in this brochure. For other load conditions or hole configurations, please contact your Trus Joist MacMillan representative.
 - Rectangular holes are not allowed.
 - Holes in cantilevers require additional analysis.

1 3/4"	1 3/4"
2"	2"

See illustration for allowed hole zone.

MARY C SHELBLE
CASEY ARCHITECTURAL SPECIALISTS
1615 NORTH WARREN AVENUE
MILWAUKEE WI 53202

Dear Mrs. Shelble:

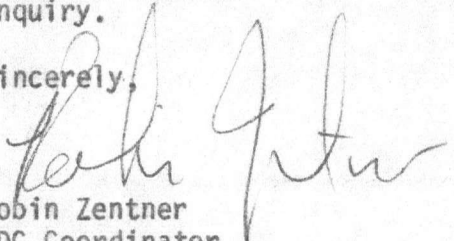

In response to your inquiry as to the plaster for acceptance under ILHR 21.29 (11), the department has determined the following.

The plaster which encroaches on the fireplace opening is acceptable as noncombustible material based on the following information which was submitted by the owner:

1. A bonding agent is provided on the surface of the fireplace brick in order to adhere the plaster to the front surface of the fireplace.
2. The plaster is a minimum of 1 inch in thickness and up to as much as 3 inches in thickness in various places.

As such, the plaster as shown in the drawings is acceptable as noncombustible materials within 6 inches of the fireplace opening. Thank you for your inquiry.

Sincerely,

Robin Zentner
UDC Coordinator
