Dear Mr. Botcher,

Our names are Greg and Ann Lucke. We live at 8580 N. Fox Croft Lane. I am writing this letter per my employer and owner of the house, Mrs. Betty Schuett. Mrs. Schuett lives at 6969 Barnett Lane. The wind storm that took place on 03/7/17 and 03/08/17, blew down a fence in our yard, which provided privacy and blocked the lights from the businesses behind and to the north of our house. We are hoping the following businesses would put up a new fence to protect our privacy and block their lights from our bedroom windows:

- 1: Face to Face at 8585 N. Port Washington road. ( I have spoken to them about the fence. They suggested the 9 ft. high fence that encloses our yard would be continued to the north and we concur.)
- 2: Water Stone Bank at 8607 N, Port Washington road. (Their drive through lights are very bright and on 24/7.)

3: Walgreens at 8615 N. Port Washington Road. The fence behind Walgreens was in disarray when we moved in. Trash from their dumpsters often ends up in our yard.

The area around the culvert separating our property, Water Stone Bank and Walgreens has been used as a short cut to Fox Croft Lane. A new fence would be a good deterrent for this type of activity. It would take approximately 78 feet of fencing.

Enclosed are pictures of the fence before and after it fell, and a night time picture of the lights from the drive through at the bank.

Thank you for your time and consideration. We look forward to hearing from you.

Sincerely,

Greg and Annie Lucke

Dear Mr. Wyderka:

On February 26, 1991 I inspected the water heater you installed at 8580 N. Fox Croft Ct. Our concerns are as follows:

- 1) According to the installation requirements found attached to the water heater, it appears that the chimney must maintain a clearance of at least 6" to combustibles. We noted only a 2 " separation.
- 2) The manufacture requires a separate 115 volt branch circuit to this unit. Also NEC Code does not approve of your use of an extension cord to provide power to this water heater.
- 3) The manufacture requires at least a 12" clearance from your vent to grade. The Building Code does not approve of your method of removing ground from below the vent terminal to meet this requirement. (The code requires the ground at the foundation wall to slope away from the dwelling for positive drainage).

Please contact me as soon as possible to schedule reinspection of this installation to determine code compliance.

If you have any questions please feel free to contact me.

Sincerely,

Scott Miller  
Inspector
